DETAILED ACTION

Allowable Subject Matter

1. Claims 1-16 are allowed.
2. The following is an examiner's statement of reasons for allowance: Prior art fails to teach or fairly suggest a solid imaging device, in combination with all the other elements claimed, that after the reset gate resets a potential of the charge detection node, the transfer gate transistor is turned ON so as to allow the signal charge to be transferred from the photoelectric conversion section to the charge detection node, and thereafter a potential of the drain is changed from a HIGH state to a LOW state to a HIGH state while both of the transfer gate transistor and the reset gate transistor are maintained in an ON state (claims 1 and 9).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
 - a. Fossum (U.S. Patent 6,667,768) discloses a solid imaging device wherein the photodiode is reset using the flood and fill technique. However, Fossum fails to disclose the photodiode being reset from the drain of the reset transistor while

the potential of the drain is being changed from a HIGH state to a LOW state to a HIGH state while both of the transfer gate transistor and the reset gate transistor are maintained in an ON state.
